

Rich Appearance of Thick-Cut Shingles

Robust, thick-cut DECRA Shingle XD provides the bold look and distinct shadow lines of heavy architectural shingles in a lightweight roofing profile that can withstand the elements.

Metal roofs have a lifespan that is 2-3 times longer than traditional roofing materials like asphalt. As the lightest roofing material on the market, DECRA Shingle XD can eliminate the need for a complete tear-off of the existing roof, saving time, labor, and expense for roofing remodels and upgrades.

DECRA Shingle XD stands up to hail, rain, fire, storm debris, and even hurricane-force winds while providing the same aesthetics of asphalt shingles.

Strength Against the Elements

Wind
Up to
120 mph

Hail
Class 4
