

Superior Quality Meets Maximum Efficiency.

Simonton® Reflections® 5500 Series

When you choose Simonton® Windows & Doors, you're choosing **premium, custom-built products** that are continually recognized for outstanding quality and exceptional energy efficiency. In 2020, Simonton Windows & Doors was once again named "**Highest in Overall Quality**" for vinyl windows in Builder Magazine's Annual Brand Use Study. This is the sixth time that Simonton has won the highest overall quality award, which is more than any other American window manufacturer.

Select **Simonton Reflections® 5500** windows have been recognized by ENERGY STAR® as **2020 Most Efficient Products**. The Most Efficient distinction identifies products that offer cutting-edge energy efficiency and represents the best performing ENERGY STAR windows available.

According to energystar.gov, **triple-pane ENERGY STAR certified windows** can save homeowners as much as \$580 a year when they replace old single-pane windows.*

*Ranges are based on the average savings among homes in modeled cities. Actual savings will vary based on local climate conditions, utility rates, and individual home characteristics.

The Most Energy-Efficient Choice for Your Home.

The ultra-efficient, Simonton® Reflections® 5500 triple-pane glass system combines key elements that enhance thermal efficiency, interior comfort, and lower heating and cooling costs.

A. Triple-pane Insulating Glass Unit

A 1" triple-pane insulating glass unit (I.G. unit) consists of three panes of double-strength glass that creates two separate air spaces. This advanced system increases insulation and resistance to temperature transfer which helps keep your home's interior temperature at an ideal level and energy costs down.

B. Gas Fill

Argon or Krypton gas is placed in the two separate air spaces of the triple-pane I.G. unit, Argon gas is six times and Krypton is twelve times denser than air providing additional insulation.

C. Super Spacer®

The non-metallic foam Super Spacer® is non-conductive and virtually eliminates temperature transfer from the interior and exterior for optimal thermal performance.

D. ProSolar® Low-E Glass

Delivering solar control, ProSolar® and ProSolar Shade Low-E glass keeps warmth inside during winter months and deflects the sun's heat to retain cooled air in summer. Also, it helps block damaging ultraviolet rays that can cause interior fading.

E. Thermal-Efficient Vinyl

Vinyl windows with 15 sealed multi-chambered profiles in the head, sill and sash deliver excellent insulation against temperature fluctuations while offering virtually maintenance-free care.

F. Quality Construction

Fusion-welded construction bonds each corner together to create a strong, durable frame that resists air and water infiltration.

AAMA® Gold

Every Simonton built window is AAMA® Gold Certified, which means that it has passed stringent tests for thermal performance, air leakage, water infiltration and wind pressure.
